- MONGOLIA - Siberian Roe Deer August - October

We organize the Siberian Roe Deer hunt in the North of Mongolia, close to the Russian border, in an area of soft hills and woods alternated by open areas and cultivations. In the middle of the hunting area we have made a new hunting house with five double rooms and an almost Italian cooking. Roe Deer hunt is done by waiting in the morning and in the evening and by search with

4WDs. In five hunting days one can choose two or three good trophies. The hunting area is located after a 6 hour drive from Ulaan Bataar so that the hunters can use the evening of the day of arrival for hunting as well. In the same area there are many black grouse and grey partridges which one can hunt during the day. The possibility to encounter wolves also exists.
