Bok Balear

October – April

Bok Balear is a new hunting specie in the Balearic Islands, more exactly found on the island of Palma de Majorca. It was acknowledged as a hunting specie only in 2007. The hunting areas for this pure specie are very few; as of now there is only one which has had an official hunting reserve certification despite the fact that these goats are numerous all over the island, but these are not as purebred, meaning that purebred animals can be

found in only one reserve.

Hunting is done in the mountains, with walks of about 2-3 hours, not very demanding. Accommodation is in small hotels near the hunting area.

Rates:

| | |
|-------------------------------------|---------------------|
| 3/2 hunting days | € 1.200 |
| Trophy up to 62 cm (representative) | € 2.800 |
| Trophy up to 70 cm (bronze) | € 3.900 |
| Trophy up to 78 cm (silver) | € 4.900 |
| Trophy up to 90 cm (gold) | € 6.000 |
